The application has been amended as follows:

Claim 1:

A method of determining data, comprising the steps of:

- (a) displaying a handbook on a computer display screen, said handbook including a left page, a right page, and at least one binder ring interconnecting the left page to the right page;
 - (b) locating a page in said handbook being displayed on said computer display screen;
- and

(c) determining said data from said page in said handbook and displayed on said computer display screen, said data determined during the determining step (c) being displayed on said computer display screen, wherein the determining said data comprises obtaining and/or calculating data;

wherein the determining step (c) for determining said data from said page in said handbook being displayed on said computer display screen comprises the steps of:

selecting from said page in said handbook a desired amount of salt from a particular weight of solution on said page in said handbook on the condition that said particular weight of solution is located on said page in said handbook;

locating on said page in said handbook a first weight of solution associated with a first amount of salt and a second weight of solution associated with a second amount of salt, where said first weight of solution is greater than said particular weight of solution and said second weight of solution is less than said particular weight of solution;

interpolating between the first and second different weights of solution to determine said desired amount of said salt having a value which lies between the first and second amounts of salt on the condition that said particular weight of solution is not located on said page in said handbook; and

displaying said desired amount of said salt on said computer display screen.

Claim 20:

A program storage device readable by a machine tangibly embodying a program of instructions executable by the machine to perform method steps for determining data, said method steps comprising:

(a) displaying a handbook on a display screen of said machine, said handbook including a left page, a right page, and at least one binder ring interconnecting the left page to the right page;

(b) displaying a page in said handbook on said display screen of said machine in response to an input instruction; and

(c) determining said data from said page in said handbook being displayed on said display screen of said machine in response to a set of input data and a further set of data stored in a database, said data determined during the determining step (c) being displayed on said display screen of said machine;

wherein the determining step (c), for determining said data from said page in said handbook being displayed on said display screen of said machine, further comprises:

determining from said page in said handbook a desired amount of salt from a particular weight of solution on said page in said handbook on the condition that said particular weight of solution is located on said page in said handbook;

determining on said page in said handbook a first weight of solution associated with a first amount of salt and a second weight of solution associated with a second amount of salt, where said first weight of solution is greater than said particular weight of solution and said second weight of solution is less than said particular weight of solution;

interpolating between the first and second different weights of solution to determine said desired amount of said salt having a value which lies between the first and second amounts of salt on the condition that said particular weight of solution is not located on said page in said handbook; and

displaying said desired amount of said salt on said computer display screen.

Claim 39:

A system adapted for determining data, comprising:

apparatus comprising a personal computer adapted for displaying a handbook on a computer display screen, said handbook including a left page, a right page, and at least one binder ring interconnecting the left page to the right page;

apparatus adapted for locating a page in said handbook being displayed on said computer display screen; and

apparatus adapted for determining said data from said page in said handbook being displayed on said computer display screen, said data being displayed on said computer display screen;

wherein said apparatus adapted for determining said data from said page in said handbook being displayed on said computer display screen comprises:

apparatus adapted for selecting from said page in said handbook a desired amount of salt from a particular weight of solution on said page in said handbook on the condition that said particular weight of solution is located on said page in said handbook;

apparatus adapted for locating on said page in said handbook a first weight of solution associated with a first amount of salt and a second weight of solution associated with a second amount of salt, where said first weight of solution is greater than said particular weight of solution and said second weight of solution is less than said particular weight of solution;

apparatus adapted for interpolating between the first and second different weights of solution to determine said desired amount of said salt having a value which lies between the first and second amounts of salt on the condition that said particular weight of solution is not located on said page in said handbook; and

apparatus adapted for displaying said desired amount of said salt on said computer display screen.

Claims 17, 36 and 55 are cancelled.

Allowable Subject Matter

4. Claims 1-16, 20-35, 39-54 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 20 and 39 when considered as a whole, are allowable over the prior art of record. Specifically, prior art of record fail to clearly teach or fairly suggest the combination of following limitations:

- wherein the determining step (c) for determining said data from said page in said handbook being displayed on said computer display screen comprises the steps of:
- selecting from said page in said handbook a desired amount of salt from a particular weight of solution on said page in said handbook on the condition that said particular weight of solution is located on said page in said handbook;
- locating on said page in said handbook a first weight of solution associated with a first amount of salt and a second weight of solution associated with a second amount of salt, where said first weight of solution is greater than said particular weight of solution and said second weight of solution is less than said particular weight of solution;
- interpolating between the first and second different weights of solution to determine said desired amount of said salt having a value which lies between the first and second amounts of salt on the condition that said particular weight of solution is not located on said page in said handbook; and
- displaying said desired amount of said salt on said computer display screen.

The dependent claims 2-16, 21-35 and 40-54 further adds limitations to the allowable subject matter of the corresponding independent claims; thus are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the

issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
